

ABDUL HADI

Chicago, IL | 872-806-8304 | abdullhadi7865@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years building scalable backend systems using Python, Flask, and MySQL. Currently serving as GitHub Manager & Backend Developer for Chicago nonprofit. Proven expertise in RESTful APIs, database optimization, and Agile collaboration. Strong foundation in AWS, Docker, Kubernetes, and CI/CD pipelines. Seeking Backend Engineer or SDE roles to deliver high-impact solutions.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, C++

Backend & Frameworks: Flask, Django, RESTful APIs, FastAPI, Microservices

Databases: MySQL, PostgreSQL, Redis, SQL optimization, Salesforce

DevOps & Cloud: Docker, Kubernetes, Terraform, Jenkins, AWS (EC2, S3, RDS), CI/CD (GitHub Actions)

Tools: Git, GitHub, Linux, Agile/Scrum, Jira, Unit Testing

PROFESSIONAL EXPERIENCE

GitHub Manager & Backend Developer (Volunteer) | YourPassion1st, Oak Park, IL

April 2026 – Present

- Manage GitHub organization infrastructure and workflows for nonprofit serving under-resourced young adults; establish version control best practices for development team
- Develop documentation and training materials for volunteer contributors; provide backend development support for Salesforce integration
- Collaborate with cross-functional team using Agile methodologies to deliver pro-bono technology solutions for community impact

Associate Software Engineer | Star Enterprises, Hyderabad, India

January 2022 – June 2023

- Developed Python automation scripts for network configuration, reducing manual setup time by 30% and improving operational efficiency
- Built internal dashboards using Python and Flask to monitor network devices and client data, enabling real-time infrastructure visibility
- Designed MySQL databases for client and device inventory; wrote optimized SQL queries for data retrieval and reporting
- Collaborated in 4-person Agile team, participated in code reviews, and debugged production issues using Git version control

TECHNICAL PROJECTS

E-Commerce Backend API | Python, Flask, PostgreSQL, Redis, Docker, AWS

- Architected scalable RESTful API with 10+ endpoints for product catalog, cart, and orders; implemented JWT authentication
- Optimized PostgreSQL performance by 40% through indexing; deployed to AWS EC2 with Docker and CI/CD pipeline achieving 99.5% uptime

Task Manager API | Python, Flask, PostgreSQL, Docker, Kubernetes, Terraform

- Developed task management API with CRUD operations, role-based access control (RBAC), and real-time task assignment
- Deployed using Kubernetes with 3 replicas; provisioned AWS infrastructure with Terraform; integrated Jenkins CI/CD reducing deployment time by 60%

EDUCATION

Master of Science in Information Studies | Trine University
